

MAVERICK FORENSIC INCIDENT REPORT

Case ID: MAV-20260919-064753-217CE1E3 | Generated: 2026-09-19T06:47:53.016617+00:00 | Platform: MAVERICK 1.0.0

1. Case Summary & Threat Assessment

VERDICT: LOW	Risk Score: 0.1510 / 1.0000		
	Threat Indicators Flagged: 0		
	Summary: Overall threat assessed as LOW (Risk Score: 0.15/1.00) with 0 suspicious/malicious indicators identified across forensics modules.		
Subject:	[ALERT] Urgent SOC Investigation Briefing - Ref #9042		
From:	Security Ops		
To:	analyst@target-corp.internal		
Date:	Fri, 18 Sep 2026 10:15:28 +0000		
Message-ID:	<20260918101528.9ZzY8712@corp-defense.com>		
Chain of Custody SHA-256:	217ce1e353d392c7bbc07f6b5596fcd37e6196b1673de752abdf1750bd821a39		

2. Evidence Fusion Scoring Breakdown

Forensic Dimension	Assigned Weight	Weighted Score	Contribution / Status
Machine Learning Phishing	40% (max 0.40)	0.1510	Lexical vector probability & term attribution
Email Authentication Forensics	20% (max 0.20)	0.0000	SPF / DKIM / DMARC status and From: domain alignment
Attachment Static Forensics	20% (max 0.20)	0.0000	MIME type magic bytes, VBA macros, and PE headers
IOC & Geolocation Signals	20% (max 0.20)	0.0000	Raw IP URLs, high-abuse TLDs, and routing anomalies

Key Contributing Factors:

- Machine Learning: Message body classified as legitimate/benign (37.7% phishing probability).
- Authentication: Passed all SPF, DKIM, and DMARC alignment checks.
- Attachments: All 1 attachment(s) passed static forensic analysis cleanly.
- IOC/Geo: No anomalous network infrastructure or suspicious domain patterns detected.

3. Machine Learning Phishing Classification Findings

Phishing Probability:	37.74%	Predicted Label:	BENIGN	Model Confidence:	62.3%
Influential Lexical Term	Indicator Class	Model Feature Weight	TF-IDF Weight	Directional Impact	
attached	BENIGN	-3.7920	0.2022	-0.7666	
review	BENIGN	-1.5971	0.2104	-0.3359	
activity	BENIGN	-0.8032	0.2822	-0.2267	
team	BENIGN	-0.7560	0.2262	-0.1710	
30	BENIGN	-0.8980	0.1684	-0.1513	
detected	BENIGN	-0.2861	0.2917	-0.0835	

4. Email Authentication Forensics & Domain Alignment

Protocol	Result Status	Identifier Alignment	Evaluated Domain(s)
SPF	PASS	ALIGNED	corp-defense.com
DKIM	PASS	ALIGNED	corp-defense.com
DMARC	PASS	PASS	From: corp-defense.com

- Authentication Notes:
- Found 1 Authentication-Results header(s). Parsing receiver MTA assertions.
 - Header #1 successfully parsed via standard RFC 8601 authres engine.
 - SPF domain 'corp-defense.com' aligns with From: domain 'corp-defense.com' (relaxed (organizational domain)).
 - DKIM signing domain 'corp-defense.com' aligns with From: domain 'corp-defense.com' (relaxed (organizational domain)).

5. Indicators of Compromise (IOCs) & Excluded Subnets

Category	Forensic IOC Values
Public IPs	198.51.100.12 (header), 198.51.100.25 (header)
Excluded IPs (RFC 1918)	10.20.30.40 (header, body)
Target Domains	[None]
Extracted URLs	[None]
Mentioned Emails	[None]

6. Geolocation Intelligence Telemetry

IP Address	Country	Region / City	ASN	ISP / Organization
198.51.100.12	Romania	București, Bucharest	[None]	TEST-NET-2
198.51.100.25	Romania	București, Bucharest	[None]	TEST-NET-2

EVIDENTIARY DISCLAIMER: IP geolocation data represents inferred enrichment derived from third-party lookup tables (ip-api.com) rather than directly observed header facts. Physical coordinates may represent ISP point-of-presence rather than true sender location.

7. Attachment Static Forensics

Filename	Claimed MIME	Detected Magic Format	SHA-256 Digest	Verdict
Incident_Report_9042.pdf	application/pdf	PDF document	0f2698da6a7c0eb9423e5486c458f3cb...	CLEAN

8. Investigation Timeline (Received Hop Chain)

Hop #	From Host / Sender IP	Receiving MTA	Hop Timestamp	Delay
0	mail-client.corp-defense.internal (10.20.30.40)	relay-us-east.corp-defense.com	2026-09-18T10:15:28+00:00	0.0s
1	relay-us-east.corp-defense.com (198.51.100.12)	mx1.target-corp.com	2026-09-18T10:15:32+00:00	4.0s
2	mx1.target-corp.com (198.51.100.25)	mailserver.target-corp.internal	2026-09-18T10:15:35+00:00	3.0s

9. Incident Remediation & Forensic Recommendations

Priority	Category	Recommended Action & Evidentiary Rationale
----------	----------	--

LOW	General Incident Response	No immediate remediation required. Retain email in normal archive and continue standard security monitoring. <i>Rationale:</i> Email passed all forensic, cryptographic, machine learning, and static binary inspections cleanly.
-----	---------------------------	--
